Alternate Building Technologies and Construction Methods –
Potential for accelerating the supply of new housing in Africa

RICHARD CHINA
PRESIDENT & CEO,
INTERNATIONAL GREEN STRUCTURES (IGS)

Prior to starting International Green Structures (IGS), Richard China spent most of his contracting career as President of Primo Electric, a family-owned electrical contracting firm serving the Mid-Atlantic region for over 40 years. After the sale of Primo Electric, Richard assumed COO role of Integrated Electrical Services, a Houston based, NYSE Fortune 1000 company electrical contracting company.

As COO he was responsible for $1.6 billion in revenue and 13,000+ employees. In 2007, Richard and Michael Morgan founded the company, a sustainable emergency response housing solution, which was approved and awarded a contract by the federal government as a next generation disaster housing solution.

As President and CEO of International Green Structures, Rick is leading the efforts to provide green structure solutions for a variety of building needs; housing, schools, healthcare facilities and offices on a global basis. Their innovative, unique building structures are durable, transportable and easily assembled, making them attractive to the global marketplace and with an impactful Economic Model IGS is providing “the solution to the global housing crisis”.

Potential for accelerating the supply of new housing in Africa
